

Danny O Ventures + GreenGrid

Project-specific critical-power and energy-infrastructure collaboration for qualified data-center, utility and industrial requirements.

Danny O Ventures LLC

- Houston-based commercial sourcing and project-development coordination.
- Market development, opportunity origination and buyer requirement qualification.
- Commercial relationships and coordination between project stakeholders.

GreenGrid technology contribution

- Technology, solution architecture and technical specifications.
- Engineering inputs and project-specific equipment scope.
- Technical coordination within the responsibilities agreed for each opportunity.

Solution areas for evaluation

- Data-center power architecture, modular distribution, UPS and HVDC.
- BESS, microgrids, power monitoring and hybrid-power integration.
- Grid and third-party generation integration; EPC, commissioning and lifecycle-support coordination.

Engagement pathway

- Share location, capacity, load profile, timeline and sponsor authority.
- Qualify the requirement, then agree the appropriate NDA and technical exchange.
- Define technical scope, responsible parties and commercial terms in writing.

Danny O Ventures LLC and GreenGrid (China) Technology Co., Ltd. remain independent companies. Scope, participation and responsibilities are established through opportunity-specific agreements. This brief does not confirm an award, equipment inventory or delivery commitment.
